Our philosophy is based on a single concept: we are more than just a manufacturer of carpets, we're a home decorator with the creativity to inspire beautiful interiors and transform the generic into magic.

Because people are seeking beauty, elegance, comfort and value for their homes our designers and technicians create collections that are modern, accessible and crafted to bring the utmost pleasure. And because your tastes are unique, we commit to bold concepts that bring the ultimate in sophistication to your floorcovering.

We are also acutely aware of the need to act for the good of the environment and to play our part in the common challenge to take care of our beloved planet. We place the environment front and centre of our dedication to creating beautiful floorcoverings, so you can enjoy your home decoration knowing you've also made a commitment to a better future.

At Louis De Poortere you will find rugs, carpets and stair runners, which you can freely mix and match to make your decorating Home Sweet Home experience a pleasure. Our passion is to offer you this pleasure.

# TRADITION MADE CIRCULAR

Founded in 1929, Louis De Poortere has set the standard for excellence in machine-woven carpets and rugs, bringing Belgian craftsmanship and enduring quality to homes and businesses worldwide. As a family-owned company now in its fourth generation, Louis De Poortere blends the heritage of Wilton weaving with modern Jacquard flatweave techniques, creating innovative, trend-setting designs that redefine the art of rug-making. Each product is proudly crafted in Belgium, upholding our commitment to ethical production and supporting local artisans.

In 2023, Louis De Poortere launched the Ecorugs collection, a major step toward environmental responsibility. Using recycled polyester yarn—repurposed through its Take Care Program—the Ecorugs line is a testament to the vision for sustainable, circular design, demonstrating how tradition can adapt to support a healthier planet.

# LIVING BEYOND WALLS

## Indoor - Outdoor Harmony

As the lines between indoor and outdoor living continue to blur, the garden and terrace have evolved into more than just outdoor spaces, they have become true extensions of the home. These areas are no longer merely functional; they've transformed into an additional room, a seamless continuation of your interior, offering comfort, creativity, and a reflection of your personal style.

Recognizing this shift, Louis De Poortere is proud to announce that, **starting 2026, its full collection of Iconic Ecorugs will be available for outdoor use.** Crafted with sustainability in mind and designed for both elegance and durability, these rugs bring the same timeless quality of your indoor spaces to your outdoor oasis, creating a harmonious flow between your interior and exterior lifestyle.

# WASHABILITY

Ecorugs are designed with real life in mind. Thanks to their flatweave polyester construction, they are naturally stain-resistant and easy to maintain, they're all machine washable now.

This means they can go directly into your washing machine for a deep clean, making life with pets infinitely easier.

For day-to-day care, vacuuming and spot cleaning are usually enough and for tougher stains, we recommend the James Starter set, a professional-grade cleaning kit specially developed for textile care. It's safe, effective, and perfect for keeping your Ecorug looking as good as new.

# ECORUGS COLLECTION 2026

## Color in Motion

The 2026 collection explores design as a sensory experience, where color, gesture, and material interact to create atmospheres that are both contemporary and soothing. Each rug becomes a canvas for expression, oscillating between graphic exploration and poetic spontaneity.

With Drop, color takes center stage. Inspired by Indian celebrations of renewal, the motif radiates from the rug's center, allowing the pigments to express themselves in all their intensity against an immaculate background. In a similar quest for chromatic sensitivity, Sendai draws on the spirit of traditional tie-dye. The hues blend in subtle gradations, evoking the artisan's touch and the poetry of color transitions. Reinterpreted with a contemporary sensibility, this inspiration brings depth, softness, and understated elegance to the space.

This pursuit of fluidity also extends to the shapes themselves. In 2026, the collection expands with a new peanut-shaped size, featuring organic and enveloping lines. This unique silhouette breaks with the rigidity of the traditional rectangle and introduces a natural softness, inviting a new way of inhabiting space.

Finally, Louis De Poortere takes another step forward with the launch of the Custom Size Program. For a selection of designs, it is now possible to choose personalized dimensions and special shapes, offering greater creative freedom and a tailor-made solution for the most demanding projects. This approach affirms more than ever our commitment to placing design at the service of interior architecture and contemporary living spaces.

# NEW SHAPE

Inspired by nature's soft imperfections, our new peanut-shaped rug brings a playful yet refined organic form to any space. Its gently curved silhouette breaks away from rigid lines, adding warmth, movement, and a sense of ease to both modern and relaxed interiors. Designed to feel natural and inviting, this shape creates a subtle statement while harmonizing effortlessly with surrounding furniture.

# CUSTOM SIZE

“De la forme naît l’idée”

- Gustave Flaubert

Designed as a canvas for creativity, our custom size program invites you to move beyond standard dimensions. Woven on expansive 3-meter-wide rolls, three signature designs can be shaped into bespoke rectangles or flowing organic silhouettes. Each cut is an opportunity to respond intuitively to space, allowing form, proportion, and movement to come together in a truly personalized rug.

# SENDAI

## MEDITATION COLLECTION

Sendai finds its inspiration in traditional Indian fabric techniques, where colors melt into one another to create gradients of great delicacy. These tie-dye effects, imprinted with artisanal gestures, have been reinterpreted here with a contemporary gaze. Rather than faithfully reproducing these motifs, the design strives to capture their essence: the fluid transition of hues, the sensation of movement, the poetry of color passages.

In Sendai, every nuance is placed with care to create a composition that is both mastered and open, offering a subtle balance between spontaneity and structure. The gradients, worked in large flat tints, give the rug a modern character without ever breaking with the softness of its original inspiration. The sobriety of the motif, combined with this exploration of color, confers a discreet elegance upon Sendai.

The result is a rug that integrates naturally into contemporary interiors: streamlined enough to let the space breathe, yet bearing a visual identity that brings depth and warmth. SENDAI invites an attentive look, a quiet contemplation, like a landscape revealing itself in successive nuances.

# CHESS

## CRAFT COLLECTION

The Chess design presents a deconstructed interpretation of the classic checkerboard pattern, transforming it into a bold, graphic statement piece. With its unstructured form, this rug strikes the perfect balance between the disorder of its design and the harmony of its carefully chosen color palette.

The checkerboard appears fragmented, with shapes that seem to float in place, creating an intriguing, dynamic visual. Integrated subtle material effects bring texture and depth, enriching the design with a tactile dimension. The contours of the brightly colored squares are crisp and defined, offering clarity while adding a striking energy to the overall aesthetic.

## ANTIQUARIAN COLLECTION

The Ushak design draws inspiration from the timeless designs of the Turkish Ushak tribe, known for creating intricate rugs used in both mosques and churches. These traditional patterns, rich in cultural significance, are reinterpreted here with faded colors, reminiscent of the later 20th-century versions that have weathered the test of time.

The result is a rug that combines historical depth with contemporary elegance, creating a beautifully aged aesthetic that complements any modern or classic interior. The Ushak design embodies the essence of tradition while offering a sophisticated, muted palette that adds warmth and character to any space.

# SUSTAINABILITY WITH STYLE

## Sustainability - A Step Closer to 100% Circularity

At Louis De Poortere, we believe that true quality goes hand in hand with responsibility. Following the launch of our first responsible Ecorugs Collection in 2023 with 20% recycled content, we can proudly share the increase of 40% in 2025 and already 70% in 2026.

Our rugs are not only 100% recyclable but also crafted with an ever-increasing share of recycled materials a significant step toward our ultimate goal of creating products made entirely from recycled content. Each step forward reflects our unwavering commitment to leaving the world a better place than we found it.

The 2026 collection is a celebration of this journey. Every rug is more than just a design piece; it is a testament to thoughtful craftsmanship and our shared responsibility to care for the planet. Together, we are weaving a future that is as sustainable as it is beautiful.

100% RESPONSIBLE

# WHY USE POLYESTER?

Historically, we have used natural cotton within our rugs, but with the challenge to protect the natural world and provide a bright future for civilization, we believe it is important to make sure our products are more circular. Polyester gives us this opportunity through its long life and an ability to be returned to new rugs.

100%

## Mono-material

Every part of our Ecorugs is made from polyester. By creating a 100% mono-material construction, we eliminate the need to separate materials and make it easier to recycle Ecorugs at the end of their life.

## Longer product life

In terms of durability, polyester fibres are stronger and more durable than cotton. In fact, we compared the wear of new Ecorugs with a cotton construction and found that cotton wears out three times more under the same usage. The use of 100% polyester means a longer life for our rugs and less frequent replacement.

## Recyclability

Polyester is endlessly recyclable without degradation in quality, giving us the potential to adopt a circular product model in the future. Recycling polyester lets us extend the life of the materials we use, reducing demand for new raw materials.

## Sustainability with style

When it comes to beautiful products to decorate your home, we know you desire exceptional quality and a uniquely personal style. We also know that the future of the planet is a worry for us all. Our rugs consider both, bringing you an eco-friendly alternative that moves towards circularity and which doesn't compromise style. You can enjoy the beauty of your Ecorug knowing you're choosing a better future.

## A fibre of the future.

As a synthetic material, it can be recycled efficiently and infinitely, without compromising its quality throughout its life cycle.

We're aware of the concerns associated with the production of virgin polyester derived from petroleum, a non-renewable resource. However, alongside our Take Care Program to make recycling a shared responsibility, our Ecorugs offer a move towards a sustainable solution by extending polyester's useful life and reducing our demand on these resources.

Polyester has exceptional recycling properties and for every kilogram of polyester we recycle, we get one kilogram back. This means no waste and every gram of material is used efficiently. Also, with polyester's exceptional durability, each rug possesses a long life, no matter how many times it finds a new home. Polyester is truly a fibre of the future.

# A LIFE MORE CIRCULAR

We believe that closing the loop with our mono-material construction, gives us the best opportunity to lower our footprint, and this is how we create a more circular life for your Louis de Poortere Ecorug:

## TAKE CARE PROGRAM

Take Care is our way to make sure that we share responsibility in extending the life of your Ecorug and reclaiming it for recycling. Making returns easy through Take Care is what's needed to make the recycling of Ecorugs a possibility: It's easy for you and puts us in control of the process.

Through Take Care, we can both share a role in giving Ecorugs a circular life.

### 01. Maintenance

Keeping your Ecorug looking new is one of the best ways to give it a long life. That's why we've made every Ecorug machine washable and set out the perfect way to care for your new rug in our Take Care guidance.

### 02. Return

Once your Ecorug has reached the end of its time with you, it's easy to return it. Use the QR code and serial number to arrange a free\* return. It's a simple way to contribute to a more sustainable future.

### 03. Reuse or Recycle

Once your Ecorug finds its way back to us, we assess it and decide what to do. Rugs in good condition are cleaned, reconditioned and are put up for second-hand sale. Those not able to be sold are sent to our recycling network to be returned to raw polyester material.

\*Only free return available for EU countries at this moment (UK incl). For updates, please check the website.
